3 B.Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using wireflow

🎯 AIM

To design a prototype with both familiar and unfamiliar navigation elements and evaluate ease of use across different user groups using Wireflow.

🔹 STEP 1: PLAN YOUR PROTOTYPE

1. Define Navigation Elements

✓ Familiar Navigation:

- NEXT button
- Back button
- Linear flow (screen → screen)

✓ Unfamiliar Navigation:

- Swipe gestures
- Hidden navigation (no visible buttons)
- Tap image to navigate
- Long press for extra info

2. Sketch Layout (Based on Your UI)

Create flow like this:

Colosseum → Christ → Taj Mahal → Greece Walls

Each screen contains:

- Image

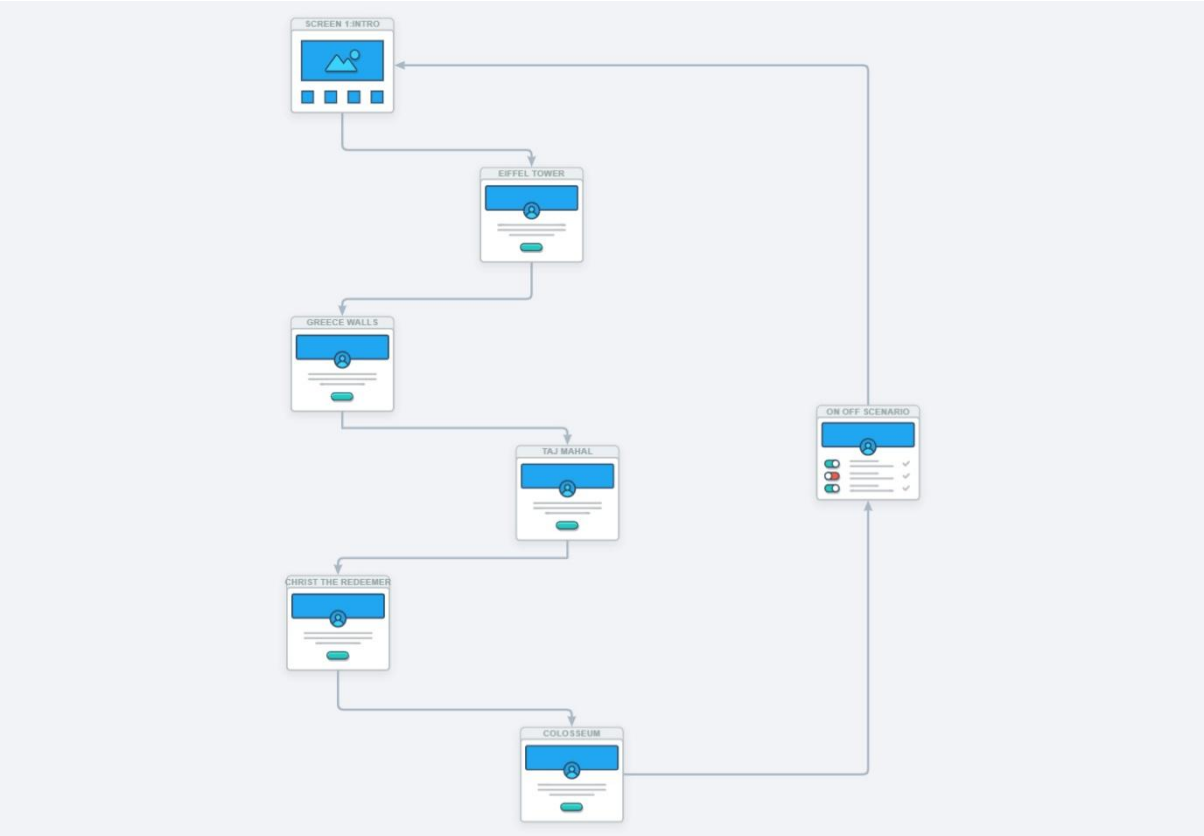
- Title
- Facts list
- NEXT button

🔹 STEP 2: SET UP WIREFLOW PROJECT

1. Go to https://wireflow.co/
2. Click **New Project**
3. Name: **"Wonders Navigation Wireflow"**
4. Choose **Blank Project**

🔹 STEP 3: DESIGN YOUR WIREFLOW SCREENS

🟦 Create 4 Screens (Cards)



1. Colosseum Screen

- Label: *Screen 1 – Colosseum*

- Add:
    - Image placeholder
    - Text (facts)
    - Button: NEXT

2. Christ the Redeemer Screen

- Label: *Screen 2 – Christ*
- Same structure

3. Taj Mahal Screen

- Label: *Screen 3 – Taj Mahal*

4. Greece Walls Screen

- Label: *Screen 4 – Greece Walls*

🔹 **STEP 4: ADD NAVIGATION FLOWS (IMPORTANT)**

✓ **Familiar Navigation Flow**

Use arrows in Wireflow:

- Colosseum → Christ (NEXT button)
- Christ → Taj Mahal
- Taj Mahal → Greece Walls

Add **Back arrows**:

- Christ → Colosseum
- Taj Mahal → Christ

✓ **Unfamiliar Navigation Flow**

1. Swipe Navigation

- Add note on arrow:

    - “Swipe Left → Next Screen”
    - “Swipe Right → Previous Screen”

2. Hidden Navigation

- Add flow:
    - “Swipe Up → Jump to Greece Walls”
    - “Swipe Down → Go to Home”

3. Image Tap Navigation

- Add arrow:
    - “Tap Image → Next Screen”

4. Long Press Interaction

- Add note:
    - “Long press facts → Show popup”

🔹 **STEP 5: LABEL YOUR FLOWS**

👉 Very important for marks

Use annotations like:

- “Familiar Navigation”
- “Unfamiliar Navigation”
- “Gesture-based interaction”

🔹 **FINAL CONCLUSION**

- Familiar navigation improves usability
- Unfamiliar navigation adds innovation but reduces clarity
- Best UI combines both elements
