4 A.Conduct task analysis for an app and document user flows. Create corresponding wireframes using Lucidchart.

🎯 AIM

To analyze user tasks in an online shopping application, document user flows, and create corresponding wireframes using Lucidchart.

📘 INTRODUCTION

Task analysis is the process of identifying and understanding the steps a user takes to complete a specific goal in an application. User flow diagrams visually represent these steps, helping designers improve usability and navigation. Lucidchart is a diagramming tool used to create flowcharts and wireframes efficiently.

🧩 TASK IDENTIFICATION

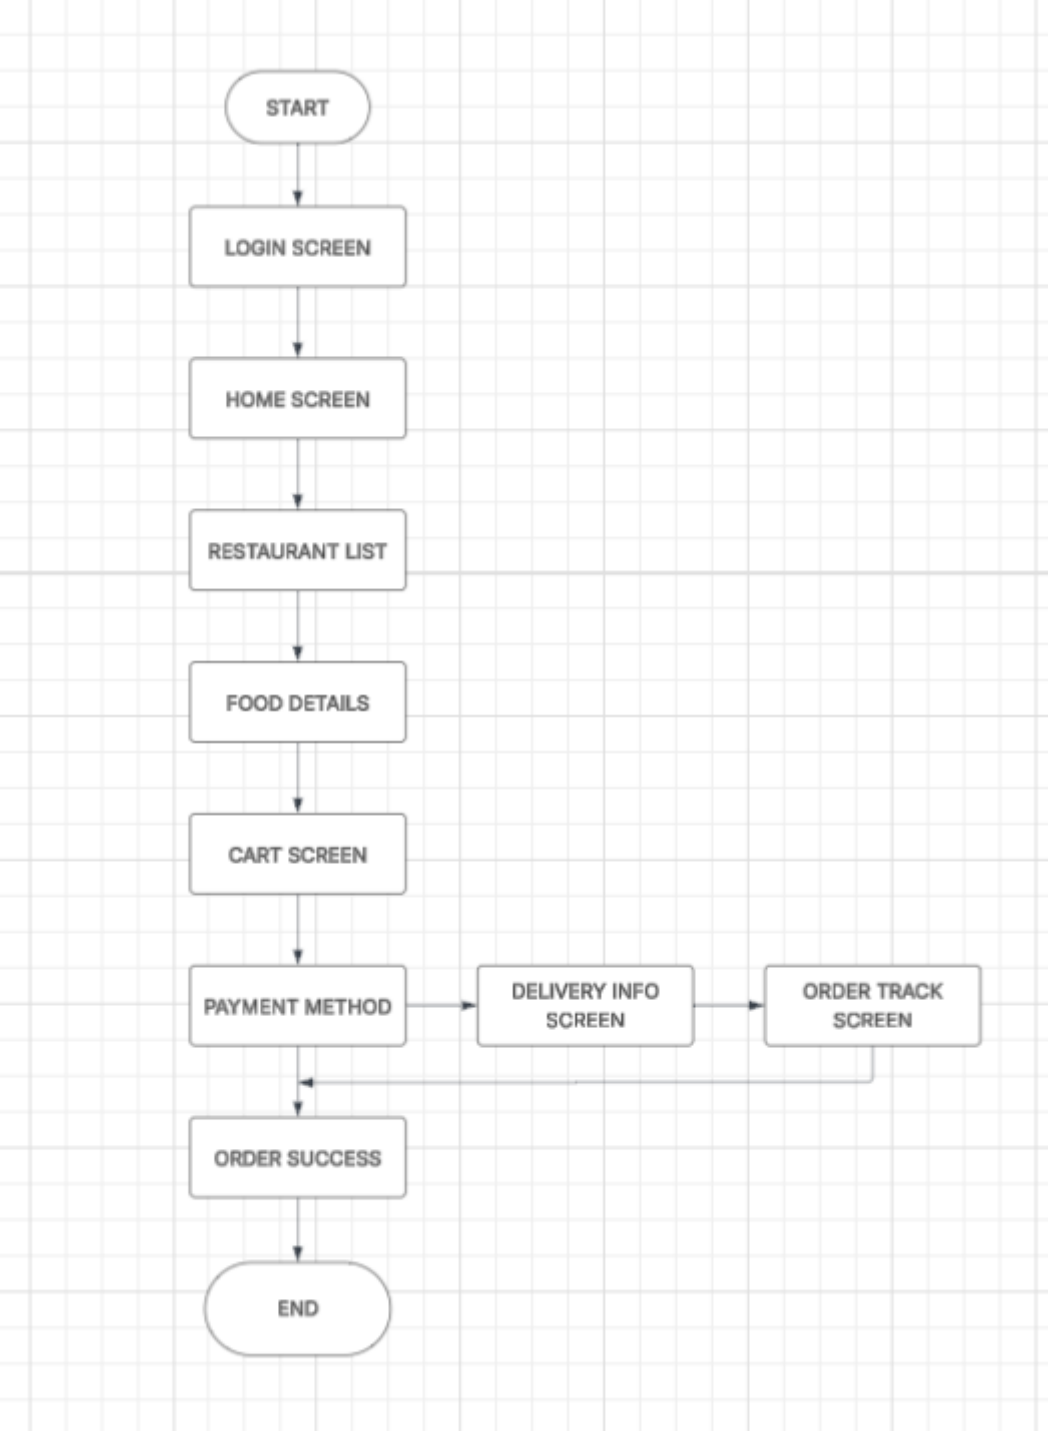
The following key tasks in an online shopping app are identified:

1. Browsing products
2. Searching for a product
3. Adding products to cart
4. Checkout process

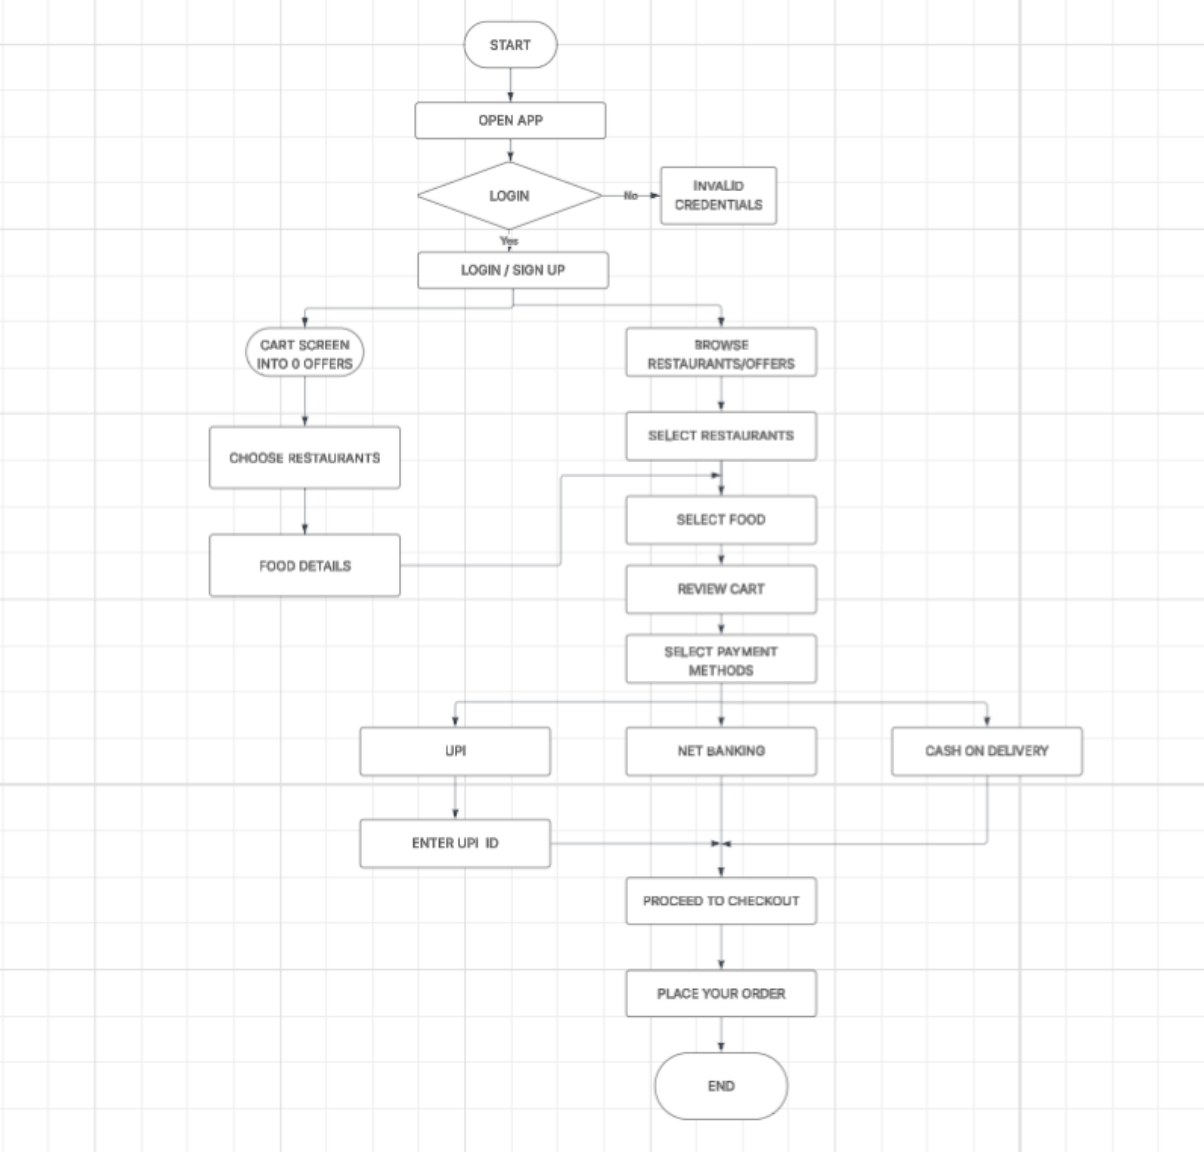
🔄 USER FLOW DIAGRAM (COMBINED FLOW)

Master Flow:

Start → Open App → Login/Register → Home Screen →
Browse/Search → Product List → Product Details →
Add to Cart → Cart → Checkout →
Enter Shipping Details → Payment → Place Order → End



🔍 DETAILED TASK ANALYSIS



1️⃣ Browsing Products

- User opens home screen
- Selects category
- Views product list
- Clicks product
- Views product details

Flow:
Home → Categories → Product List → Product Details

2️⃣ Searching for a Product

- User taps search bar
- Enters keyword
- Views results
- Selects product

Flow:
Search → Enter Query → Results → Product Details

3️⃣ Adding Product to Cart

- User views product
- Selects options (size, quantity)
- Clicks "Add to Cart"

Flow:
Product Details → Select Options → Add to Cart

4️⃣ Checkout Process

- User opens cart
- Reviews items
- Proceeds to checkout
- Enters shipping details
- Enters payment details

- Places order

Flow:
Cart → Review → Checkout → Shipping → Payment → Place Order

🔷 DECISION POINTS

- Is user logged in?
- Is product available?
- Continue shopping or checkout?
- Is payment successful?

🧱 WIREFRAME DESIGN

📱 Home Screen

- Search bar
- Categories
- Featured products

📱 Product List Screen

- Product grid
- Filters and sorting options

📱 Product Details Screen

- Product image
- Description

- Price
- Add to Cart button

🟦 Cart Screen

- List of selected items
- Quantity controls
- Total price
- Checkout button

🟦 Checkout Screen

- Shipping address form
- Payment options
- Place order button

🟦 Order Confirmation Screen

- Order success message
- Order details

⚙️ PROCEDURE (USING LUCIDCHART)

1. Open Lucidchart and create a new document
2. Select a blank template
3. Add shapes:
    - Oval → Start/End

    - Rectangle → Process
    - Diamond → Decision
4. Label each step clearly
5. Connect shapes using arrows
6. Organize flows logically
7. Add colors for clarity
8. Save and export the diagram

📊 RESULT

The user flow diagram and wireframes for the online shopping application were successfully created using Lucidchart. The flow clearly represents all major user tasks and navigation paths.

📃 CONCLUSION

- Task analysis helps in understanding user behavior
- User flows improve navigation design
- Wireframes provide a visual structure of the application
- Lucidchart is effective for creating structured diagrams
