8a Create storyboards to represent the user flow for a mobile app (e.g., food delivery app) using Balsamiq

Name:Ishwaryaa N

Roll no: 240701196

AIM

The aim is to create storyboards representing the user flow for an Organic Shop mobile application using Balsamiq.

PROCEDURE

Step 1: Define the User Flow

1. Identify Key Screens:

List the main screens of the Organic Shop app:

- Home Screen
- Category/Product Listing Screen
- Product Selection Screen
- Cart Screen
- Checkout Screen
- Order Confirmation Screen

2. Map the User Journey:

Understand how a user navigates through the app:

- User opens the app
- User searches or selects a category
- User views products
- User adds items to cart
- User proceeds to checkout
- User confirms the order

Step 2: Create Storyboards Using Balsamiq

1. Install Balsamiq:
   - Download and install from [Balsamiq Official Website]

2. Create a New Project:
   - Open Balsamiq
   - Click on “New Project”
   - Name the project: *Organic Shop App*

3. Add Wireframe Screens:
   - Click the “+” button
   - Create separate screens for:
     - Home
     - Product Listing

    - Cart
    - Checkout
    - Confirmation

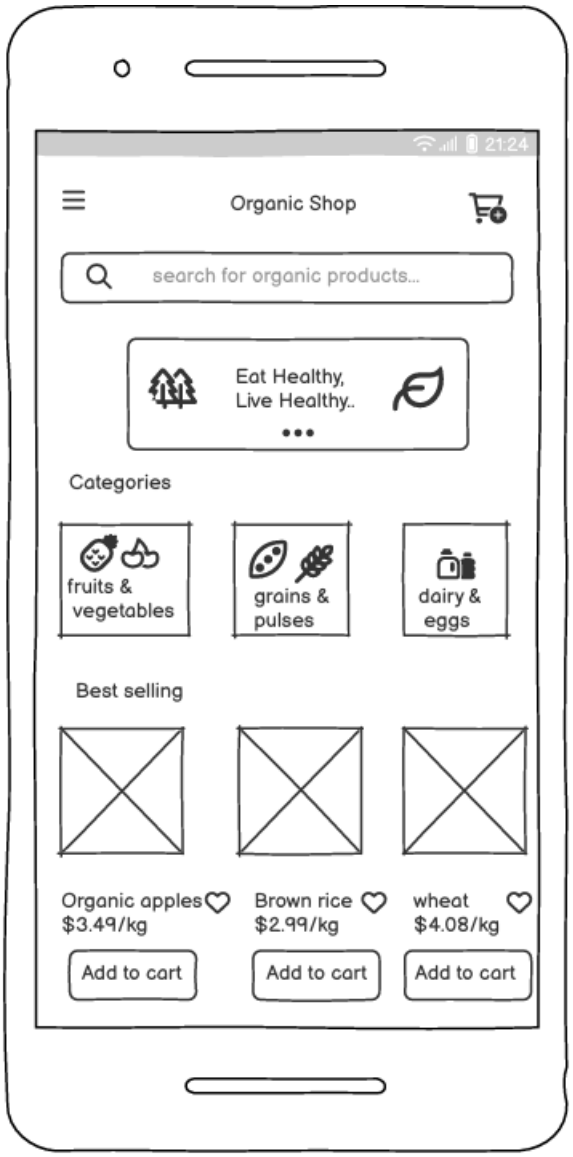
4. Design Each Screen:
   - Use Balsamiq components such as:
    - Buttons
    - Text fields
    - Image placeholders
    - Labels
   - Keep the design simple (low-fidelity)

5. Organize the Flow:
   - Arrange screens in sequence:
    - Home → Products → Cart → Checkout → Confirmation
   - Use arrows to connect screens and represent navigation

EXAMPLE SCREENS FOR ORGANIC SHOP APP

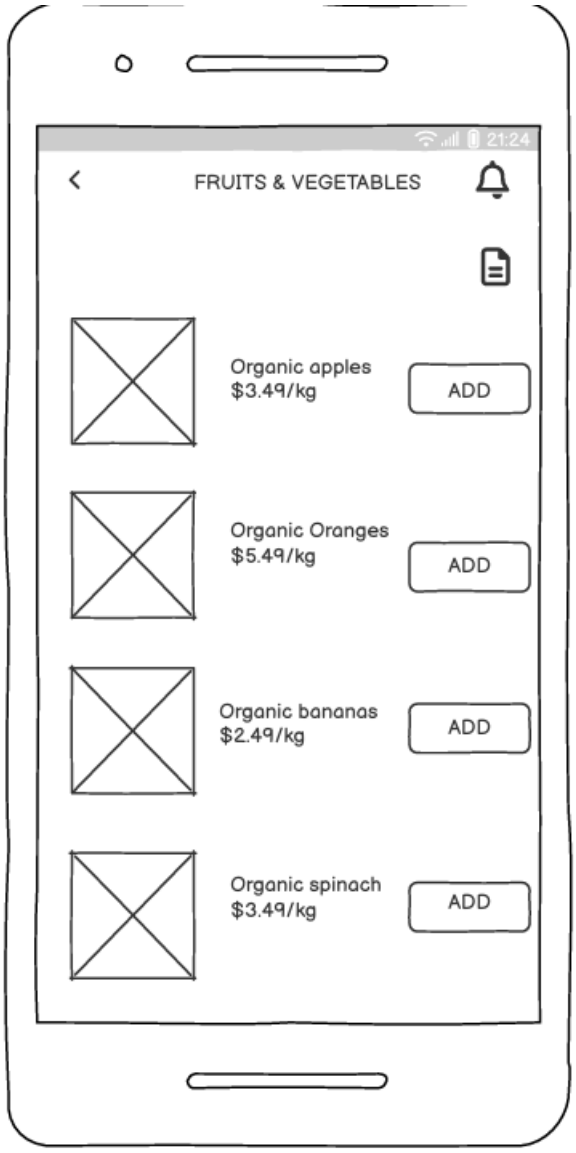
1. Home Screen
   - Search bar: “Search organic products…”

- Categories:
    - Fruits & Vegetables
    - Grains & Pulses
    - Dairy & Eggs
- Best-selling products
- “Add to Cart” buttons



2. Product Listing Screen

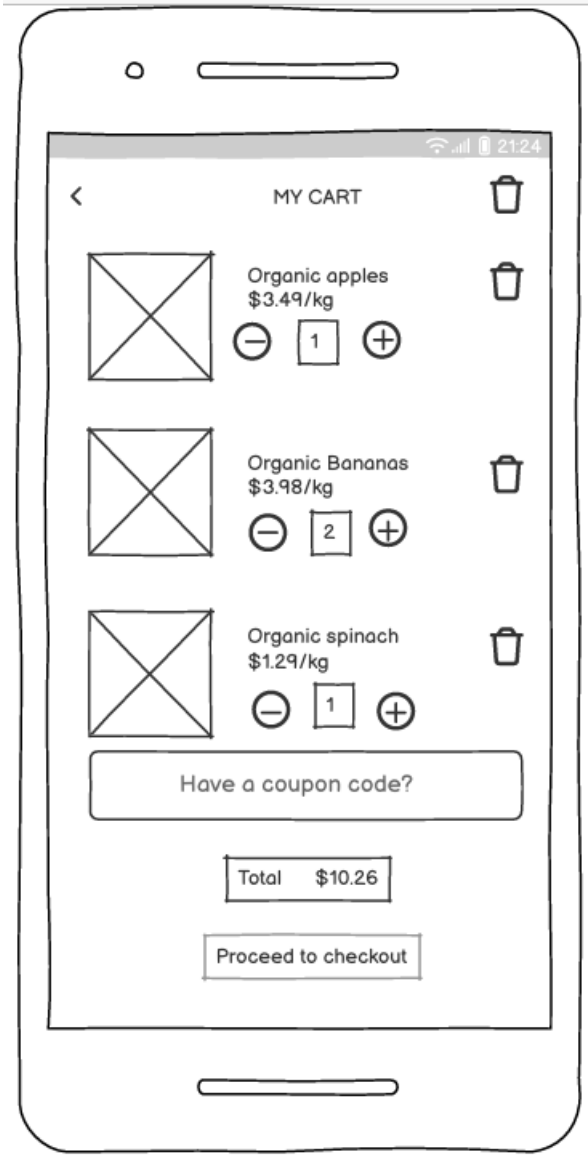
- List of organic products
- Each product shows:
  - Image
  - Name (e.g., Organic Apples, Bananas)
  - Price per kg
- “Add” button for each item



3. Cart Screen

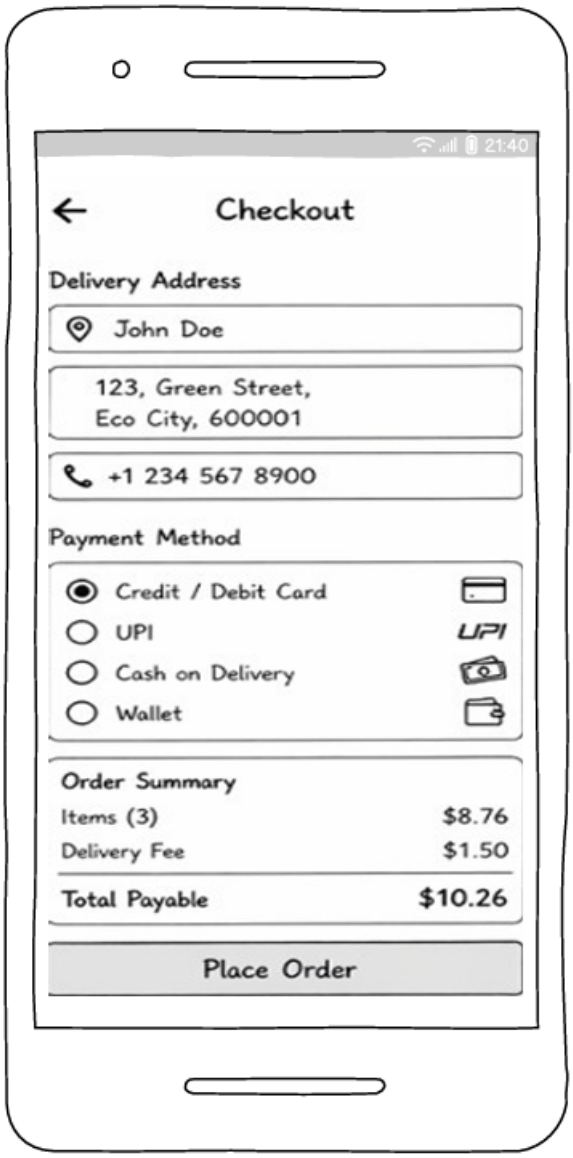
- Displays added items

- Shows:
    - Quantity
    - Individual price
    - Total amount
- Checkout button



4. Checkout Screen
    - Delivery details (address)

- Payment options
- “Place Order” button



5. Order Confirmation Screen

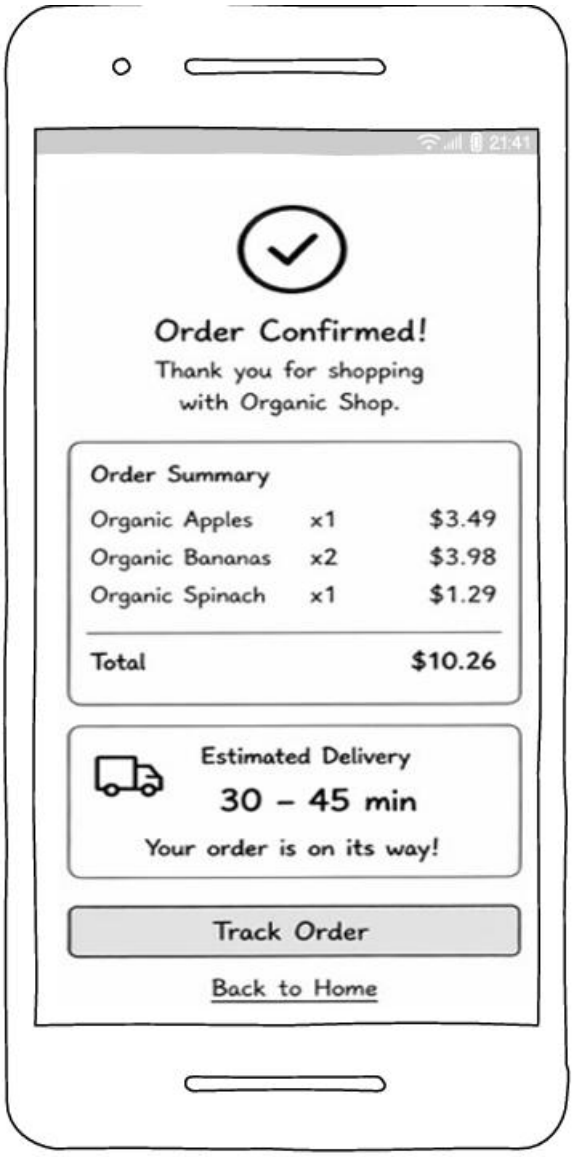
- Order summary
- Total amount
- Confirmation message

- Estimated delivery time

EXAMPLE OUTPUT (WIREFRAME DESCRIPTION)

Home Screen

- Search Bar: Allows users to search for organic products
- Categories: Helps users browse product types



Product Screen

- Product List: Displays items with name and price
- Add to Cart: Button to add products

Cart Screen

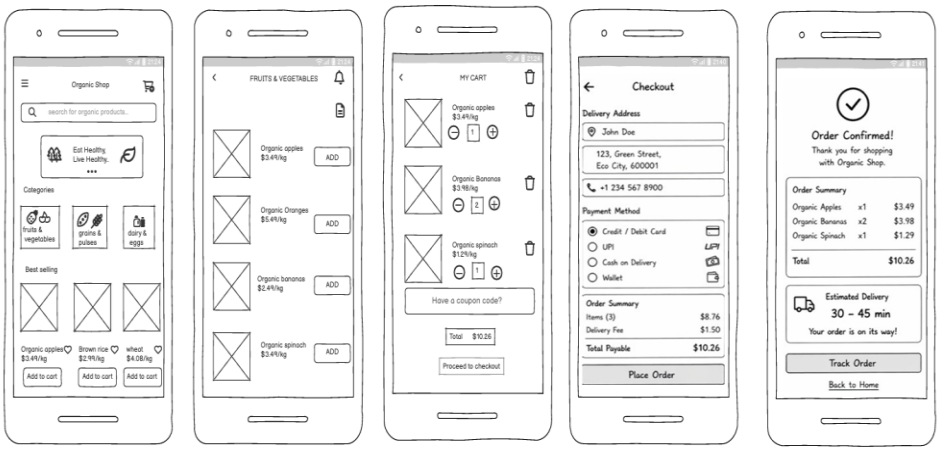
- Items Added: Shows selected products
- Checkout Button: Proceeds to payment

Checkout Screen

- Address Form: Enter delivery details
- Payment Options: Select payment method
- Place Order Button

Order Confirmation Screen

- Order Summary: Displays order details
- Delivery Time: Shows estimated delivery



RESULT

The storyboard for the Organic Shop mobile application was successfully created using Balsamiq, clearly representing the user flow from product browsing to order confirmation.

CONCLUSION

This project demonstrates how wireframing tools like Balsamiq can be used to design user-friendly mobile applications. The Organic Shop storyboard ensures smooth navigation and effective user experience.
